

Self-managing, self-healing business appliance designed to simply and reliably extend your IT investment to branch offices.

Maverick BRANCH OFFICE

Maverick BRANCH OFFICE is an on-premise business appliance and a complete solution created to simply and reliably extend the existing IT investment, skills and data already available in your head office to your branch offices; keeping your people connected and working together.

Branch offices with 5 – 500 employees do not need technical resources on-site to engage the power of this self-managing and self healing solution. And, it launches within 30 minutes, so your branch offices will connect quickly and efficiently with an entire platform of file management and office productivity tools.

- Simplifies the deployment of infrastructure at your branch offices with an all-in-one server appliance
- Extend the same tools and processes already available in your head office to any and all of your branch offices
- Reduces costs to deploy, maintain, and support email to your branch office employees
- Speeds the deployment of software updates in your branch offices
- Enables you to provide pre-configured servers to branch offices
 - without having to worry about installation
- Self-managing and self-healing server and automated backups reduce disruption and downtime to employees in case of an unplanned outage
- No IT skills needed at the branch office!
- Enjoy peace of mind that data in your branch offices is secure

- **Email, Calendar & Contacts**
- **Office Productivity**
- **Central File & Print Management**
- **Data Backup**
- **Disaster Recovery**
- **Firewall**
- **Automated System Updates**

Gain piece of mind that your data is protected

- Continuous data protection with frequent, automated disk backups
- Schedule backups as often as every 15 minutes
- Prioritize what and when you want to backup

A disaster recovery plan if the unexpected occurs

- Recover lost data/system settings in minutes—without IT staff at the branch office
- Store backup drives off-site and ensure recovery, even from fire, theft or system destruction

Communicate and collaborate - email, calendars, and contacts

- Send and receive email, schedule meetings, and manage contacts
- Choice of Lotus Notes, Microsoft Outlook® or web-based email interfaces

A proactive approach to network security

- Integrated firewall safeguards your network from unauthorized intrusions

Freedom from the high cost of proprietary office productivity software

- Create, edit and share documents, presentations and spreadsheets
- Take advantage of fully featured and easy to use productivity tools
- Import, edit, and save a variety of other file formats including Microsoft Office files

Centrally manage files and printers

- Share files across the branch, and with head office, regardless of system type (PC, Mac®, etc.)
- Create central directories that improve employee access to information
- Set-up, share and manage printers from a single location

Stay connected - in the office, at home, and on the go

- Virtual Private Network enables anywhere, anytime access for mobile employees
- Leverage the skills and data already available at the head office to keep branch offices connected

Automated system updates and proven reliability

- Full operating system (OS) updates in minutes
- Reduces the aggravation of continual OS patch management
- Reliable Linux-based system keeps your systems up and running—continuously

Work Smart, Stay Productive

- Retains the user experience with a variety of supported file formats/email clients
- Plays well with other technology so you can deploy a wide variety of application types including Microsoft Windows and Linux applications
- Deploy optional add-on applications targeted to your specific needs
