

An all-in-one IT solution for small and medium businesses

A proven platform that delivers enterprise-class performance and reliability, the Maverick SMART SERVER SOLUTION is a full-featured solution that can help minimize costs, simplify the complexity traditionally associated with IT, and protect existing investments all while being designed to meet the unique needs of smaller businesses.

A Change from Traditional Solutions

The Maverick SMART SERVER SOLUTION balances performance, affordability and ease of use. Easily installed and configured, and requiring minimal on-site maintenance, it simplifies IT for businesses without on-site IT expertise. And the self-managing, self-healing system incorporates key features separating it from other solutions in this space.

Integrated Disk-Backup (idb)

Employing reliable, integrated disk-based backup technology, the Maverick SMART SERVER SOLUTION provides continual data protection through incremental, automated backups as often as every 15 minutes. The idb drives are removable—so leveraging primary and secondary idb drives ensures a backup copy of your data is always available.

Features

- Incremental, automated, unattended data backup
- Real-time disaster recoverability
- Integrated Firewall, Anti-Virus & Anti-Spam
- Secure remote access
- Automated system updates
- Office Productivity tools
- Email, calendar and contacts
- Central file & print management

Benefits

- Lower total IT costs
- Protect valuable data
- Facilitate communication and collaboration
- Connect to the Internet and network resources
- Host your own website and email
- Proactive network security
- Freedom from the high cost of proprietary office productivity software
- Centrally manage files and printers
- Stay connected - in the office, at home, and on the go
- Automated system updates
- Reduced downtime

Maverick SMART SERVER SOLUTION represents a significant, positive change from traditional small business IT solutions

Maverick SMART SERVER SOLUTION changes the dynamic of your client relationships - from pay-per-instance to a model of managed services

A quick return on investment and fast time to value

- Enablement measured in hours, not days
- Complete system installation in under 30 minutes

Satisfy customer needs...and wants

- Provide an appliance solution consistent with customer buying preferences
- Disaster recovery technology allows you to restore customer data in minutes**
- Leverage Lotus Foundations as a platform to deploy IBM Lotus Domino applications and run Linux® and Microsoft® Windows® applications.

Free yourself from the continual cycle of OS system patches and updates

- Reduces the need for tedious patch management and upgrades
- Full OS updates in minutes through the autonomic Linux-based system

Approach the market with all-in-one solutions designed to meet the unique IT and productivity challenges of small businesses and branch offices

Provide a complete solution — in a single package

- Integrated appliance solution means only one vendor to call
- Unique server autonomies handle backup, settings, file management, security, and more
- Automatically performs prioritized data back-ups as often as every 15 minutes
- Performs a full system restore in minutes with unique disaster recover technology
- Email, calendars and contacts with IBM Lotus Notes™ and Lotus Domino
- Offers choice with Lotus Notes, Microsoft Outlook® or web-based email interfaces
- Provides customers the ability to access a variety of different applications, including Linux and Lotus Domino, and now customers can also run Microsoft Windows applications within a VMware® container
- Enables clients to publish web pages and manage their own email domain
- Self-configuring firewall safeguards networks from unauthorized intrusions
- Anti-virus protection monitors and cleanses network files of suspicious content
- Anti-spam technology filters unwanted email
- Virtual Private Network (VPN) technology enables remote connectivity
- Enables central file and print access, management and sharing
- Create documents, spreadsheets and presentations with bundled productivity software
- Branch offices can leverage the technology, skills and data already available at the head office with the Maverick BRANCH solution.
- Optional add-on Business Partner applications are available to be deployed to target specific customer needs
- The addition of the Maverick REACH solution delivers secured instant messaging, presence awareness, VoIP and video chat capabilities optimized for small business customers

All-in-one small business and branch office appliance solutions

Maverick SMART SERVER SOLUTION

Maverick SMART SERVER SOLUTION is a family of business appliances that provide the essential software businesses need to focus on running their business, not managing computer systems. These affordable all-in-one solutions can be launched within 30 minutes and leverage self-managing and self-healing capabilities minimizing the need for human intervention. Small businesses and branch offices can now work smarter together with solutions that provide savings for the present without sacrificing scalability for the future. Just plug one in and go!

Maverick START

Provides small businesses of 5 - 500 employees with the essential software needed to focus on running the business, not managing computer systems. Email, calendars, IBM Lotus Symphony™ office productivity tools, file management, backup and recovery, network security, remote access, applications, and more.

Maverick REACH

An optional add-on that leverages IBM Lotus Sametime technology to deliver secured instant messaging, VoIP and video chat capabilities, and much more to Lotus Foundations Start customers.

Maverick BRANCH OFFICE

Enables branch offices of up to 500 employees to stay connected both within the branch and with head office. The solution provides many of the same powerful collaboration, office productivity, and other tools as Lotus Foundations Start, but also enables businesses to leverage their already existing Lotus Domino™ skills and data.
